SIRAFAT	: Requirement	for Digital Tim	ing System	
AFFECSION .	s 50-05033-62,	, dated 2 May 19	62	25X1A
l. The	Communications Bra	msh. DFO, is pa	escutly procuring	
TA	ding units from the think the	same basic uni	t aight also be	
A	、 主机 、	AT BANKSING LELI	HIII	P + India
of Lockbeed,	it is obviously me	ot possible to	ustall a clear o	LULIS
	in the U-2.			
2. The	s Development Branci	a, DPD, is proce	eding as follows	1
f m) A study is being	made of the pr	specific name manufaction	¢0
/-			min to work to t	trus.
determ	ine if the existing	system can be	made to work to t	he
determ	ine if the existing action of the analy	system can be : sta.	ande to mark to r	He
determi	ine if the existing action of the analy	system can be : sta.	ande to work to t	ming
determinatisf	ine if the existing action of the analy A survey is currently the recentary	system can be : sts. ently being mad weetsht and si	s of svailable ti	ming lation.
determinatisfic	ine if the existing action of the analy A survey is curr a with the necessar	system can be a sta- ently being mad y weight and si will fall abor	s of svailable ti se for U-2 instal t of the ideal eq	ming lation.
determinatisfic (b) system Althou ment of	ine if the existing action of the analy A survey is curve with the necessaring admittedly these riginally envisions	system can be a sta- ently being mad y weight and si will fall abor	s of svailable ti se for U-2 instal t of the ideal eq	ming lation.
determinatisfic	ine if the existing action of the analy A survey is curve with the necessaring admittedly these riginally envisions	system can be a sta- ently being mad y weight and si will fall abor	s of svailable ti se for U-2 instal t of the ideal eq	ming lation.
determinatisfic (b) system Althou ment of	ine if the existing action of the analy A survey is curve with the necessaring admittedly these riginally envisions	system can be a sta- ently being mad y weight and si will fall abor	s of svailable ti se for U-2 instal t of the ideal eq	ming lation. mip- the
determinatisfic (b) system Althou ment of	ine if the existing action of the analy A survey is curve with the necessaring admittedly these riginally envisions	system can be a sta- ently being mad y weight and si will fall abor	s of svailable ti se for U-2 instal t of the ideal eq	ming lation. mip- the
determinatisfic (b) system Althou ment of	ine if the existing action of the analy A survey is curve with the necessaring admittedly these riginally envisions	system can be s sta. ently being mad y weight end si will fall sher d, they should	e of gwailable ti se for U-2 instal t of the ideal eque acceptable to	ming lation. mip- the
determination (b) system Althou analys	ine if the existing action of the enaly A servey is curred with the necessarily envisions t.	system can be sets. ently being mad y weight end six will fall sher d, they should	of gvailable time for U-2 install to the ideal eque acceptable to	ming lation. mip- the
determinatisfic (b) system Althou ment of	ine if the existing action of the enaly A servey is curred with the necessarily envisions t.	system can be sets. ently being mad y weight end six will fall short d, they should grant of the color of th	of gvailable time for U-2 install to the ideal eque acceptable to	ming lation. mip- the
determination (b) system Althou ment of analys	ine if the existing action of the enaly A servey is curred with the necessarily envisions t.	system can be sets. ently being mad y weight end six will fall short d, they should grant of the color of th	e of gvailable time for U-2 install to the ideal eque acceptable to	ming lation. mip- the
determination (b) system Althou analys	ine if the existing action of the analy A servey is curred with the necessarian admittedly these riginally envisions to	system can be sets. ently being mad y weight end six will fall short d, they should grant of the color of th	e of gvailable time for U-2 install to the ideal eque acceptable to	ming lation. mip- the
determination (b) system Althou ment of analys (11 June 19 Distribution	ine if the existing action of the analy A survey is curve with the necessar gh admittedly these riginally envisions 1A 962)	system can be sets. ently being mad y weight end six will fall short d, they should grant of the color of th	e of gvailable time for U-2 install to the ideal eque acceptable to	ming lation. mip- the
determination (b) system Althou ment of analys (11 June 19 Distribution 182-Di	ine if the existing action of the analy A survey is curve with the necessar gh admittedly these riginally envisions 1A 962) 267	system can be sets. ently being mad y weight end six will fall short d, they should grant of the color of th	e of gvailable time for U-2 install to the ideal eque acceptable to	ming lation. mip- the
determination (b) system Althou ment of analyse (11 June 19 Distribution 182-DE 3-AC	ine if the existing action of the analy A survey is curve with the necessar gh admittedly these riginally envisions 1A 262) 278 278 279 278 279 278 279 278	system can be sets. ently being mad y weight end six will fall short d, they should grant of the color of th	e of gvailable time for U-2 install to the ideal eque acceptable to	ming lation. mip- the
determination (b) system Althou ment of analys DPD/DB/ (11 June 19 Distribution 162-DF 3-AC	ine if the existing action of the analy A servey is curred with the necessar ghadmittedly these risinally envisions 1A 162) 262) 262) 268 2690 268 268 268 268 268 268 268 268 268 268	system can be sets. ently being mad y weight end six will fall short d, they should grant of the color of th	e of gvailable time for U-2 install to the ideal eque acceptable to	ming lation. mip- the
determination matisfi (b) system Althou ment of analys 25X DPD/DB/ (11 June 19 Distribution 1&2-DI 3-AC 4-C/ 5-Cc	ine if the existing action of the analy A survey is curred with the necessar ghadmittedly these riginally envisions 1A 162) 1A 162) 1A 162) 157 168/0PD 168/0PD 168/0PD 168/0PD	system can be sets. ently being mad y weight end six will fall short d, they should grant of the color of th	e of gvailable time for U-2 install to the ideal eque acceptable to	ming lation. mip- the
25X DPD/DB/ (11 June 19 Distribution 182-DE 3-AC 4-C/ 5-Cc 6-DE	ine if the existing action of the analy A servey is curred with the necessar ghadmittedly these risinally envisions 1A 162) 262) 262) 268 2690 268 268 268 268 268 268 268 268 268 268	system can be sets. ently being mad y weight end six will fall short d, they should grant of the color of th	e of gvailable time for U-2 install to the ideal eque acceptable to	ming lation.
25X DPD/DB/ (11 June 19 Distribution 182-DF 3-AC 6-DF 7-RO	ine if the existing action of the analy A servey is curred with the necessar ghadmittedly these risinally envisions 1A 262) 278 27970 27070 27	system can be sets. ently being mad y weight end six will fall short d, they should grant of the color of th	of grailable time for U-2 install tof the ideal on the acceptable to the acceptable to EAF a Chief, DFD	25X1
25X DPD/DB/ (11 June 19 Distribution 182-DI 3-AC 4-C/ 5-Cc 6-DI 7-EC	ine if the existing action of the analy A survey is curred with the necessar ghadmittedly these riginally envisions to the control of the co	system can be sets. ently being mad y weight and six will fall short d, they should for acting the state of	of swallable tile for U-2 installe to f the ideal eque acceptable to	25X1
